

COMBINE PEACE OF MIND WITH INDEPENDENT LIVING

With PERS, you can:

- Enjoy increased peace of mind knowing you can continue living in the comfort of your own home.
- Receive prompt emergency assistance 24 hours a day, 7 days a week.
- Select a system to match your lifestyle, ranging from a basic pendant, two-way voice pendant, or emergency wall communicator that will keep you connected anywhere in your home.

Disability-Related Services

CC Communications may have disability related services, products, or information, to assist customers in accessing communications services where certain disabilities inhibit such access. Ask your CC Communications Customer Service Representative for more details.

CC Communications

ENJOY THE FREEDOM OF INDEPENDENT LIVING WITH

Personal Emergency Reporting Systems (PERS)

AFFORDABLE PERSONAL SECURITY

Knowing that seniors have a simple and dependable way to summon help in the event of an emergency is vital for them and their loved ones. Starting at \$31.95 per month, or as little as \$25.95 when bundled with other CC Communications services, you have the confidence and peace of mind that help is never more than a button-push away with PERS from CC Communications.

GET FAST AND EASY ASSISTANCE IN THE CASE OF AN EMERGENCY

The control station functions as a 24 hour communications system between the response center and the home with just a push of a button. It can also make personal contact with neighbors, family members, or a caregiver. It supports the basic pendant, two-way voice pendant, and emergency wall communicator.

STAY ACTIVE WITH A TWO-WAY VOICE PENDANT

The two-way voice pendant communicates instantly and effectively with the first responder or contact of your choice. It is the world's smallest, water-resistance 2-way speakerphone that allows you up to 600 ft. of mobility in and around your home.

REASSURANCE WHEN NOT WEARING THE PENDANT

The optional emergency wall communicator provides a mounted, two-way communication option for use in the bathroom or on the bedside table for added safety when the pendant is not being worn.
